ACTIVESTOR®

Filing and Storage

ACTIVESTOR®

Spacesaver® Storage Systems

The ActiveStor® personal file management system combines high value, flexibility, safety and security to meet the changing needs of the information age. The system features lateral files, bookcases, storage cabinets and pedestals. ActiveStor® units are available in preconfigured or customized versions to meet your specific storage requirements.

Bookcases are available in two depths: 12" (300 mm) for books and 15" (375 mm) for binders. Shelves adjust in 1" (25 mm) increments.

Storage cabinets accommodate shelf, wardrobe and media storage requirements.

Pedestals meet virtually any personal storage need. A drawer accessory is available for storage of pens, pencils, clips and other desk items. With a drawer divider system users may configure 6" (150 mm) drawer interiors for disks, microfiche, stationery and miscellaneous items.

Lateral files feature unmatched quality, superior strength and increased storage capacity. While preconfigured lateral files provide cost effective solutions for standard requirements, 1-1/2" (38 mm) upright spacing is ideal for nonstandard needs. This concept allows for multiple drawer sizes and custom solutions.

The patented interlock ensures user safety by preventing the opening of more than one drawer at a time. The interlock restages automatically to prevent damage to the system.

Heavy-gauge drawer sides are notched to accept legal, letter and metric size hanging folders. Heavy-duty ball bearing suspensions feature bumpers to prevent drawer "bounce back." Lock bars and tamper-resistant lock hooks are located on both sides of the cabinet.

Provide security for multiple users of the same cabinet with the unique individual lock option. A security pan prevents access from the drawer above. The core-removable double-bit lock is interchangeable with any lock in the ActiveStor® system and other Spacesaver storage products.
